Air cooled chiller CWFL-2000 is

specifically designed for cooling 2000W fiber laser welding machine and features dual temperature control system applicable

to cool QBH

connector/optics and the fiber laser source at the

same time.

As a user-friendly industrial chiller, <u>air</u> cooled chiller

<u>CWFL-2000</u> is equipped

with easy-to-read water level gauge and universal wheels and designed with multiple alarm functions.

Air cooled chiller CWFL-2000 features:

- 1. ±0.5°C precise temperature control;
- 2. The intelligent temperature controller has 2 control modes, applicable to different applied occasions; with various setting and display functions;
- 3. Dual temperature to satisfy different needs of fiber laser device and the optics;
- 4. With Ion adsorption filtrating and test functions conform to fiber laser device operating requirements;
- 5. Multiple alarm functions: compressor time-delay protection, compressor overcurrent protection, water flow alarm and over high / low temperature alarm;
- temperature alarm;
 6. Multiple power
 specifications; CE
 approval; RoHS approval;
 REACH approval;
- 7. Optional heater and water filter.
