Cooling 1kw fiber laser cutting equipment is quite easy with the help of industrial recirculating chiller CWFL-1000. It is an intelligent laser water chiller whose temperature stability reaches ±0.5°C. Air cooled laser water chiller CWFL-1000 is designed with high & low temperature control systems, cooling the fiber laser source and the laser head respectively at the same time.

industrial recirculating chiller CWFL-1000 is manufactured by Guangzhou Teyu Electromechanical Co., Ltd (also known as S&A chiller) which is a China-based industrial water chiller manufacturer with annual sales volume of 70000 units. It is very popular among fiber laser cutting equipment users.

industrial recirculating chiller

CWFL-1000 features:

- 1. ±0.5°C precise temperature control;
- 2. The intelligent temperature controller has 2 control modes, applicable to different applied occasions; with various setting and display functions;
- 3. Dual temperature to satisfy different needs of fiber laser device and the optics;
- 4. Multiple power specifications; CE approval; RoHS approval; REACH approval; 5. Optional heater and water filter.

The warranty for the chiller is 2 years.
