Title: Chiropractor in Seattle WA | Graham
Description: Established in 1992, Graham Chiropractic Center has been a fixture in the downtown Seattle community. We are located in the Medical Dental building Olive Way between 5th and 6th on the corner of 4th and University. Our center offers safe, drug and surgery-free treatment options for neck pain, back pain, disc herniation, musculoskeletal pain, TMJ, headaches, shoulder pain, elbow pain, wrist pain, hip pain, knee, ankle, and foot pain. Nearly every sport-related injury is diagnosed and effectively cared for by our chiropractic providers. With years of

community networking, we have developed strong relationships with diagnostic imaging centers and other providers. We work as part of your healthcare team and refer for physical therapy, massage therapy or to a medical specialist when needed. Our mission is to engage and expand the concept of Health and Care in our community through education, treatment integration, and personal empowerment. We do this in a caring and supportive environment that focuses not only on relieving pain but by offering a pathway to a better quality of life. Turning crisis into wellness one patient at a time. Make no mistake that your response to chiropractic care is practitioner dependent and not all chiropractors are created equal. In other words: Our Seattle chiropractic team is highly qualified, experienced, and dedicated to providing personalized care for your condition. We are experts in restoring proper joint motion which is now recognized as a primary source of spinal pain.
