Title: IT Outsourcing | Outsourcing It  
Description: [IT Outsourcing | Outsourcing It](#)

The task of ESKOM includes providing professional IT services (IT outsourcing), administration of IT systems, providing IT solutions and complete projects independently or as assistance of IT departments.

ESKOM is a company created and developed by unique people, which always persistently strive for a set goal.

For a dozen or so years, we have been providing IT services (IT outsourcing, IT specialists outsourcing),

implementing dedicated IT solutions in infrastructure and IT security, creating and developing software.

Our position on the IT market is developed since the year 2003. At that time, married couple of IT specialists Ewa and Sebastian Niklewicz, by using the professional experience gained in IT departments of large corporations, decided to set up [ESKOM](#) organization.

Right from the very start, we are systematically broadening the sphere of our competences as well as sales revenues. Among our customers there are both, large organizations (predominantly from the financial and public sector), and firms from the small and medium-sized businesses segment.

In 2016 Hewlett Packard Enterprise decided to assign to our firm the highest possible partnership status of HPE Platinum Partner. This status, confirmed by certificate, we have managed to maintain also the following year. HPE is a world leader in IT solutions dedicated to

companies, and the developed technologies relate to such spheres as servers, data storage, as well as network and cloud solutions.

Also in 2016 our firm was awarded the prestigious title of Gazelle of Puls Biznesu 2016 magazine. It is worthy of mentioning that the main criterion for granting this recognition was the pace of growth of the company in the years 2013-2015 (in the ranking prepared by the Puls Biznesu, we were classified high in the 19th place in the mazowieckie voivodship).
