[Air cooled chiller CWFL-2000](#) is specifically designed for cooling 2000W fiber laser welding machine and features dual temperature control system applicable to cool QBH connector/optics and the fiber laser source at the same time.

As a user-friendly industrial chiller, [air cooled chiller CWFL-2000](#) is equipped

with easy-to-read water level gauge and universal wheels and designed with multiple alarm functions.

[Air cooled chiller](#)

[CWFL-2000](#) features:

1. $\pm 0.5^{\circ}\text{C}$ precise temperature control;
2. The intelligent temperature controller has 2 control modes, applicable to different applied occasions; with various setting and display functions;
3. Dual temperature to satisfy different needs of fiber laser device and the optics;
4. With Ion adsorption filtrating and test functions conform to fiber laser device operating requirements;
5. Multiple alarm functions: compressor time-delay protection, compressor overcurrent protection, water flow alarm and over high / low temperature alarm;
6. Multiple power specifications; CE approval; RoHS approval; REACH approval;
7. Optional heater and water filter.
