Listing details

Common

Title: Description: Private Power Pole Installation, Replacement & Eris Electrical Services P/L is a licensed level 2 electrician to supply and carry out the replacement and installation of galvanised steel and timber power poles. If need be, you can also have a <u>private power</u> <u>pole installed</u> near your property, which is your very own electricity source. At Eris Electrical P/L, we supply, install, connect and maintain electrical private poles of galvanised steel, timber etc.

In any event, a Level 2 electrician should assess the reasonableness of an electric power pole or a private power pole for your property. Besides creating safer surroundings, some property owners just favour the look of a private electrical pole as it gets rid of the view of unpleasant cables from the front of your house.

Contact experienced <u>Level 2 Electrician in Sydney</u> on 0402 685 118 for Private Power Pole installation.
